

PART.203 Demons, begone!!

With increasing age, the production of female hormones is reduced. This causes a decline of the mammary glands. Furthermore, the force of the pectoral muscles decreases. By this, the Ligamentum pubium superius[※], which holds the chest, is stretched. The bigger the breasts, the higher the risk of having hanging breasts later...

[※]Superior pubic ligament, consisting of a few transparent fibers passing between the two pubic crests.

Why do women's breasts sag as they age?

A colleague
of Makoto-
san has
oversized
breasts...

The new
receptionist
Mitsuki Mitsu (22),
is a nice girl with
a sincere and
reserved
personality,
and is still a virgin.

HELLO!
HOW ARE
YOU?

MAN A
THOUSAND
THINGS
COULD BE
DONE WITH
YOUR
BREASTS!
...
FOR
EXAMPLE

AH...
FINE
THANK
YOU.

70

receptionist

HE'S ALWAYS
PROTECTING
ME...

7
14
70

SHUT IT!

ONODA-
SAN IS
REALLY
NICE...

HEY, OKAYAMA!
THAT'S
CLEARLY
SEXUAL
HARASSMENT!!

Mitsuki-san is
crushing on
Makoto-san.
Hopefully there
won't be any
conflicts...

- ② Stretch to strengthen the large pectoral muscles.

Put your hands behind your head and bend your elbows back.

- ① Stretch to strengthen the back muscles.

Stretches to tighten the chest.

By using the pectoral muscles and the back muscles, voluptuous chests can be firm and up.

Hold this position for 10 seconds.

SHE MUST BE
REALLY DAMN
ANGRY!

UPRIGHT
POSTURE AND A
FACE SABLE?

He
knew
her
well.

HELLO!

LET'S JUST
HAVE
NORMAL
SEX, OKAY?

Time for
'make-up'
sex...

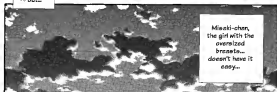

AAH!
